- Guide Price £25.00
- ISBN: 978-83-63678-88-3
- 160pp hardback, 305 x 215mm

**T**his new book on the Hurricane is anything more comprehensive than the Zero book we reviewed a few months ago and will make an excellent one-stop reference to be used on a Hurricane project. After years of very average Hurricane kits, we now have a handful of excellent ones from which to choose.

The opening chapter tells the story of the birth of the Hurricane and the need for a major change from the RAF's bi-plane fighter fleet to a modern monoplane replacement. The text is illustrated with photos and 1:72 diagrams to show the various marks as the type was developed. We then see about a dozen pages

of excellent Hurricane Mk I colour schemes included one in overall silver dope and one in High-visibility Red and a captured example in Luftwaffe markings. As development progresses, we are guided through other Hurricane marks and versions such as the Sea Hurricane with more excellent photos, plans and artwork.

From about mid-way through the book the author moves on to all of the very useful photographic reference that is invaluable to us modellers. Many crisp colour photos show preserved and restored aircraft with internal and external walk around photos. Many show restorations in progress or aircraft with panels removed for maintenance work. All of this makes me hope that Tamiya adds a 1:32 Hurricane to their increasing range of WWII fighters series.

Whether you are just interested in the Hurricane as a reading and research subject or need reference for a kit build, this new book comes as a highly recommended addition to your library. (Alan Firbank)

The Hurricane was the RAF's first monoplane fighter, and was the most numerous RAF fighter during the Battle of Britain. In , more than half the German. Authors Marek Rys, Illustrator Thierry Vallet.
